

DOMINO RULES

DOUBLE NINE DOMINOES

Using all the domino pieces up to Double Nine, lay them face down on the table and mix them well. Then continue as follows:

With 2,3 or 4 players each draws - 7 dominoes

With 5 or 6 players each draws - 6 dominoes

Place the remaining dominoes together face down to form a stockpile.

How to play:

Before beginning, the players agree whether to conceal their dominoes from each other or play with their dominoes laid face up in front of them.

To Start:

The first player (usually the youngest) places one of their dominoes face up on the table. Playing clockwise, the next player adds on a matching domino. Play continues in this way slowly building a zigzag snake shape. A player who cannot add a matching domino to the snake must pick up a domino from the stockpile. The player then continues picking up dominoes until he or she has one which can be added on. If there are no stockpile dominoes left, the player misses a turn.

Finish:

The winner is the first player to play all their dominoes, or if no player manages this, the player with the fewest dominoes left - wins.

DOUBLE SIX DOMINOES

Using the 28 domino pieces, up to Double Six, lay them face down on the table and mix them well. Then continue as follows:

With 2 players each draws - 7 dominoes

With 3 players each draws - 6 dominoes

With 4 players each draws - 5 dominoes

With 5 or 6 players each draws - 4 dominoes

Place the remaining dominoes together face down to form a stockpile.

How to play:

Same as for Double Nine Domino rules

DOMINOES WILD

A special JIGSAW variation on traditional Dominoes using the two special Multi-Coloured double nine dominoes.

Same rules as for Double Nine or Double Six with one exception a player holding a Wild domino may play it at on any domino. The other end then becomes the same. ie: wild domino placed against a THREE becomes a THREE so the next piece played on that end must be a three. You cannot play a wild domino against another wild domino nor can it be used to win the game except when it is the last piece in your hand and there are no more pieces left in the stockpile.
